

IN THE ABSTRACT:

Please rewrite the Abstract as follows:

-- The ~~invention relates to a~~ barking device ~~comprises~~ includes a barking arm (1) and a barking tool (2) which is ~~mountable~~ mounted in a tool seat of the barking arm. The barking tool ~~comprises~~ has a convex mounting surface (13), while the seat surface (7) of the barking arm is concave. The barking tool is, ~~with the aid of a connecting means, mountable~~ movably mounted in the tool seat and displaceable by rotating displacement. ~~The connecting means comprises~~ It is connected to the tool seat by a screw (18) and a sleeve-like nut (21). The head (20, 22) of one of the ~~connecting means parts (18, 21)~~ screw or nut is designed to prevent displacement and rotation of the barking tool. --
